

## ComPack Solar Light

### Reliable Solar Lighting You Can Afford

We followed the above principles in creating this powerful and reliable solar lighting solution. Blue Arrow is now proud to introduce an affordable solar lighting solution which will not only save investment cost on trenching and wiring but even on installation.

**Green Technology** – ComPack Solar Light helps prevent additional green house gasses to be released into the atmosphere. It does not contain any mercury and is UV free.

**Reliability** – Many solar lighting systems cannot hold their promise on reliability. Even at severe weather conditions, our solar system is designed to work minimum 2 consecutive nights to ensure performance.

**Performance** – Our tests and performance measurements prove that ComPack Solar Light performs at or above local illumination guidelines for most areas including parks and recreation areas.

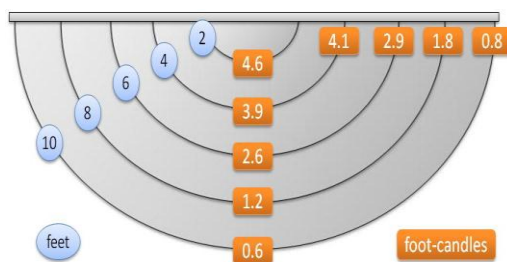

**Affordability** – ComPack Solar Light is going to amaze you with its affordability, combined with performance.

- **10W** or **20W** power options
- Integrated **motion sensor** allows power setting to be adjusted to dimmed power setting at 25% or 50%.
- **Lithium battery** charged by large solar panel
- **2 days** operational backup at recommended power setting
- **Independent battery and controller cabin** allows easy access for maintenance.
- **Aluminum cast housing** with an estimated 20 years life.
- A **turn-key solution** to solar area lighting

### APPLICATIONS

- Parks
- Recreation Areas
- Bike Trails
- Marinas
- Farms
- Stables
- Shelters
- Residential Social Centers
- Commercial Security Perimeters
- Emergency Management Centers

### SPECIFICATIONS

- Average foot-candles 2.7
- Area Coverage 20ft.x20ft.
- Color Temperature 4250K
- Weight 32 lbs.
- Dimensions 36 x 24 x 6
- Recommended Installation Height @10ft. ~ 15ft.

\*Values @ Installation Height of 10 ft.

All-in-one Simple Design

No Wiring Needed

No Trenching Needed

No Electrician Needed
